Global solutions for bathroom spaces.

The Teka Group has included a business activity devoted to manufacturing bathroom and kitchen taps for over 100 years.

Today this business activity has become Teka Strohm, belonging to the Swiss holding group Heritage B and focusing on providing global solutions for bathrooms. In addition to taps and showers, Teka Strohm offers a range of shower trays, shower enclosures, vanity units, washbasins, bathtubs, toilets and bathroom accessories.

Teka Strohm: always seeking to enhance your home and

Welcome to your comfort zone

IN YOUR HOME FOR OVER A CENTURY

Strohm boasts two factories that specialise in bathroom products, ranging from taps, shower systems and shower trays to furniture, ceramic products and shower enclosures.

Located in Hungary and China, these manufacturing plants produce the products for our partners in over 50 countries. With over 100 years' experience, we have earned the trust of installers and plumbers worldwide.

Spain

Teka Sanitary Systems S.A. is the headquarters of Strohm's bathroom product business. In charge of R&D and new technologies, as well as housing the design centre and main quality control laboratory, Teka Sanitary Systems S.A. has the main central distribution center for the business activity in Madrid.

Hungary

Market leader in Hungary and one of the main European manufacturers of gas and water ball valves. Strategically located along a major route very close to Vienna, it has recently earned the following certifications: ISO 14001 Environmental Management, ISO 9001 Quality Management System and OH-SAS 18001 Health and Safety Management standards. As production center it also been certified by CSTB-NF (France)

China

With the goal of increasing the position of Teka Strohm in the Asian market, this production plant has been earned the 14001 Environmental Management and ISO 9001 Quality Management System standard certifications. As a production centre it has also been certified by AENOR (Spain) and AFNOR and CSTB-NF (France).

TEKA STROHM, IN-HOUSE COMPLETE MANUFACTURING PROCESS

1

Casting Department

High precision foundry machines using high quality CC757S brass.

2

Machining Department

The best way to ensure perfect machining quality is to streamline all operations into one single process by using modern CNC transfer machines.

3

Grinding and Polishing Department

Robotics are used to fully automate the grinding process, assuring consistent quality.

Automated polishing of the ground parts to ensure a high gloss finish prior to application of the chrome coating.

4

Galvanic plant

Fully automated chrome plating plant fitted with the highest environmental protection technologies.

High quality chrome coating with high corrosion and scratch resistance guaranteeing durable shine (12.5 NI-Cr thickness).

5

Special finishes workshop

High resistance lacquers and other state-of-the-art finishes such as photoluminescent paint and nanotechnology.

6

Quality control, assembly and packaging

Assembly of product components and performance of function and water tightness testing on all products.

All products released with protective packaging.

RESEARCH + DESIGN + INNOVATION +

STROHM COOL LAB

All innovation, technology and product design in one place – the Strohm Cool Lab®- our in-house design department working in collaboration with international designers to create innovative features such as PVD colour, anti-bacterial and anti-fingerprint coatings.

Product enhancements born from our ideas lab working in constant pursuit of the best and most efficient solutions for you.

COOL:LAB

QUALITY CERTIFICATIONS

Most of our products meet the exacting standards of quality of a number of different markets, such as those in France (NF), Norway (SINTEF) and Spain.

STROHM

Welcome to your comfort zone

Born from our passion for developing the finest products for your home, we are proud to present this catalogue showcasing the bathroom products of our new brand: Teka Strohm.

With over 100 years' experience in this industry and our relentless pursuit of quality, usability and efficiency in all the products we make, Teka Strohm has made its mark in the world of bathrooms, seeking to transform everyday experiences into comfortable and pleasurable moments.

A hot shower after a busy day, getting ready for a special occasion, baby feet happily splashing in the bathtub, a moment of solitude and reflection, special 'me' time.....

Nowadays bathrooms are special places in the home; a space to cleanse and renew mind, body and soul. And Teka Strohm is here to cater for all your needs, providing a full range of attractive and functional products and services to ensure you have the bathroom that you need and love.

Welcome to your comfort zone.

BRAND VALUES

As a brand our values are part of our DNA. These values lie at the core of our brand experience, shaping every process, product launch and business decision. A consistent brand helps to reinforce our purpose and strengthens our relationships.

BRAND VALUES

ENABLING

At Teka Strohm we don't just design bathrooms for homes: we design them for people. Our broad range of fixtures and fittings help you build your bathroom one dream at a time. We share your vision and help it come to life step by step, piece by piece, tile by tile.

CARING

We offer outstanding design and a firm commitment to our customers' wellbeing, safety and peace of mind. We help take care of you and yours by providing quality and innovation you can trust.

INSPIRING

This is your time. You have earned it. A quiet moment for reflection and renewal, surrounded by bathroom essentials designed to make you feel good. Teka Strohm, with its vast range of products and combinations, aims to meet customers' needs and desires, making their dream bathrooms come true.

HEALTHY CLEAN WATER FROM START TO FINISH

VIDEO

*Healthy,
a clean and silent
shower that improves
your quality of life.*

Healthy
0% bacteria
0% dripping
100% health

The new *Healthy* thermostatic shower by Strohm cares for your health and that of your family. Thanks to the automatic release of the water retained in the shower column set, *Healthy* guarantees total sanitation of the ducts, as well as eliminating any possibility of dripping and annoying noises once the tap is turned off.

Healthy is responsible for eliminating the risk of bacteria generation due to water stagnation, protecting your skin and providing a safe and pleasant shower experience.

Anti-bacterial

Helping to prevent diseases with drain water technology after each use.

Child protection

Safety temperature stop at 38 °C to prevent scalding. We take care of you and your family.

Scalding prevention

All our thermostatic mixers are fitted with a 38 °C temperature stop. This device prevents unwanted temperature variations, thus reducing the risk of burns.

THERMOSTATIC SAFETY, COMFORT AND PRECISION

What is a thermostatic mixer?

It is a water mixer that automatically keeps the water temperature constant within the selected range even in the event of temperature or flow fluctuations.

How does it work?

The Stroh Thermostatic Mixer automatically mixes hot and cold water. All you have to do is select the desired temperature with the temperature regulator, which will be reached by the water flow in just a few seconds and kept constant throughout your shower.

What are the advantages of this mixer?

The Stroh Thermostatic Mixer ensures maximum user comfort and safety, as well as saving 50% energy and water consumption.

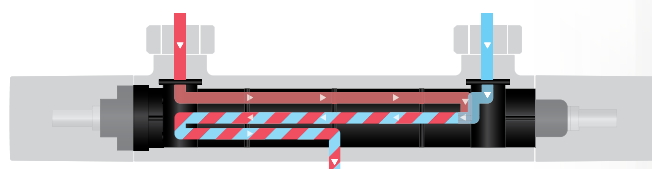

AIR CHAMBER / SAFE TOUCH CASING

Safe Touch System

Internal plastic device that creates an internal pocket of air preventing high temperatures from being transferred to the outer metal casing.

WATER FLOW THERMOSTATIC MIXER

Ensures maximum comfort and safety as well as saving 50% energy and water consumption.

Environment-friendly

Thermostatic Mixers help to save water and energy, thus protecting the environment.

Child protection

Safety temperature stop at 38 °C to prevent scalding. We take care of you and your family.

Scalding prevention

All our thermostatic mixers are fitted with a 38 °C temperature stop. This device prevents unwanted temperature variations, thus reducing the risk of burns.

DUAL CONTROL

THERMOSTATIC DESIGN WITH SINGLE LEVER MIXER FUNCTIONALITY

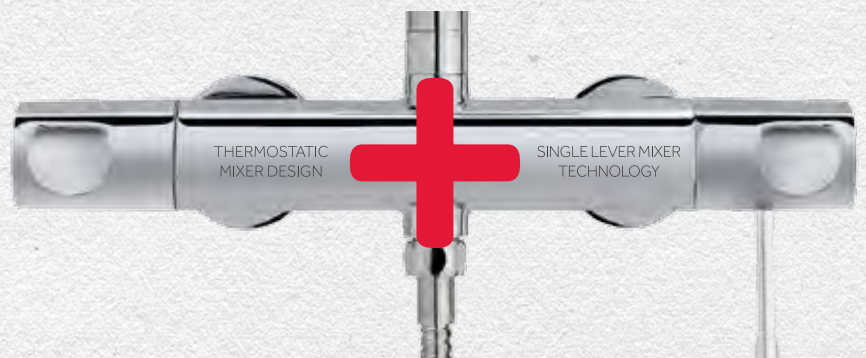

The Strohm Dual Control thermostatic shower system combines the aesthetics of the thermostatic taps with the practicality of the standard mixer. An elegant product that does not require maintenance.

The MANACOR and SOLLER shower collections feature this new technology, in addition to the Safe Touch system that prevents the hot water temperature from being transmitted through the metal body of the tap itself, thereby preventing possible burns and making it ideal for children and seniors.

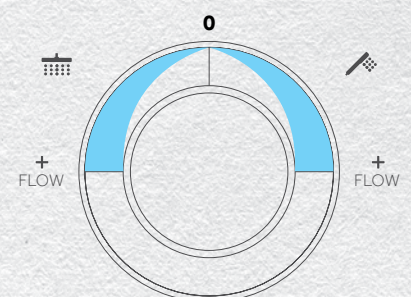

Temperature Control

The right side of this single lever mixer regulates temperature. Turn to the right/left to achieve desired water temperature.

*Dual Control
Providing greater safety,
efficiency and comfort in
the shower*

Left lever has a double function:

Selection of water outflow (showerhead or hand-shower) and Flow regulation.

SINGLE LEVER DESIGN AND SIMPLICITY

*Water saving technology
that is simple to instal*

The classical shower system with a twist. Fitted with user-adjustable rails, an anti-scale system for easy cleaning and a range of designs to suit every customer, as well as water-saving features in most models.

DIY installation

You can now instal a shower system with no need for professional fitters and builders.

Adjustable telescopic rails

The telescopic rail can be adjusted to suit your needs.

Water saving

If your water pressure is too high, we recommend installing the automatic flow control valve, which enables you to save water every time you take a shower.

UNIVERSE

A simple and versatile solution for many spaces.

Optional installation of the automatic flow control valve

If your water pressure is too high, we recommend you instal the automatic flow control valve.

This automatic flow control valve enables you to save water every time you use the shower.

Easy installation without masonry work

Easy installation without the disturbance of building work.

Anti-scale & easy cleaning

Maintenance: to remove the scale build-up, simply press the exit holes with your fingertips.

COMFORTABLE

Very smooth ceramic diverter to shift the water flow towards the shower head or hand shower.

CONVENIENT

Can be connected to any exposed mixer through a special flexible hose provided with the product.

MODERN

Innovative shape to suit latest trends in modern design.

EASY INSTALLATION

Quick and easy installation with no need for building work.

PERSONAL

You can customise your Universal system with a broad choice of shower heads or handles to suit your own personal style.

ECONOMICAL

It may be installed on any standard bath/shower or shower mixer. No need to change your taps.

ARTIK

SELF-CLEANING SYSTEM

· Self cleaning feature in one step , just press the button and they are going to come out some spikes to clean the hole.

*One-step self-cleaning system:
cleaning tips emerge from the shower
head by pressing the button.
The self-cleaning system helps keep
the shower clean on a daily basis.*

EASY AND USEFUL

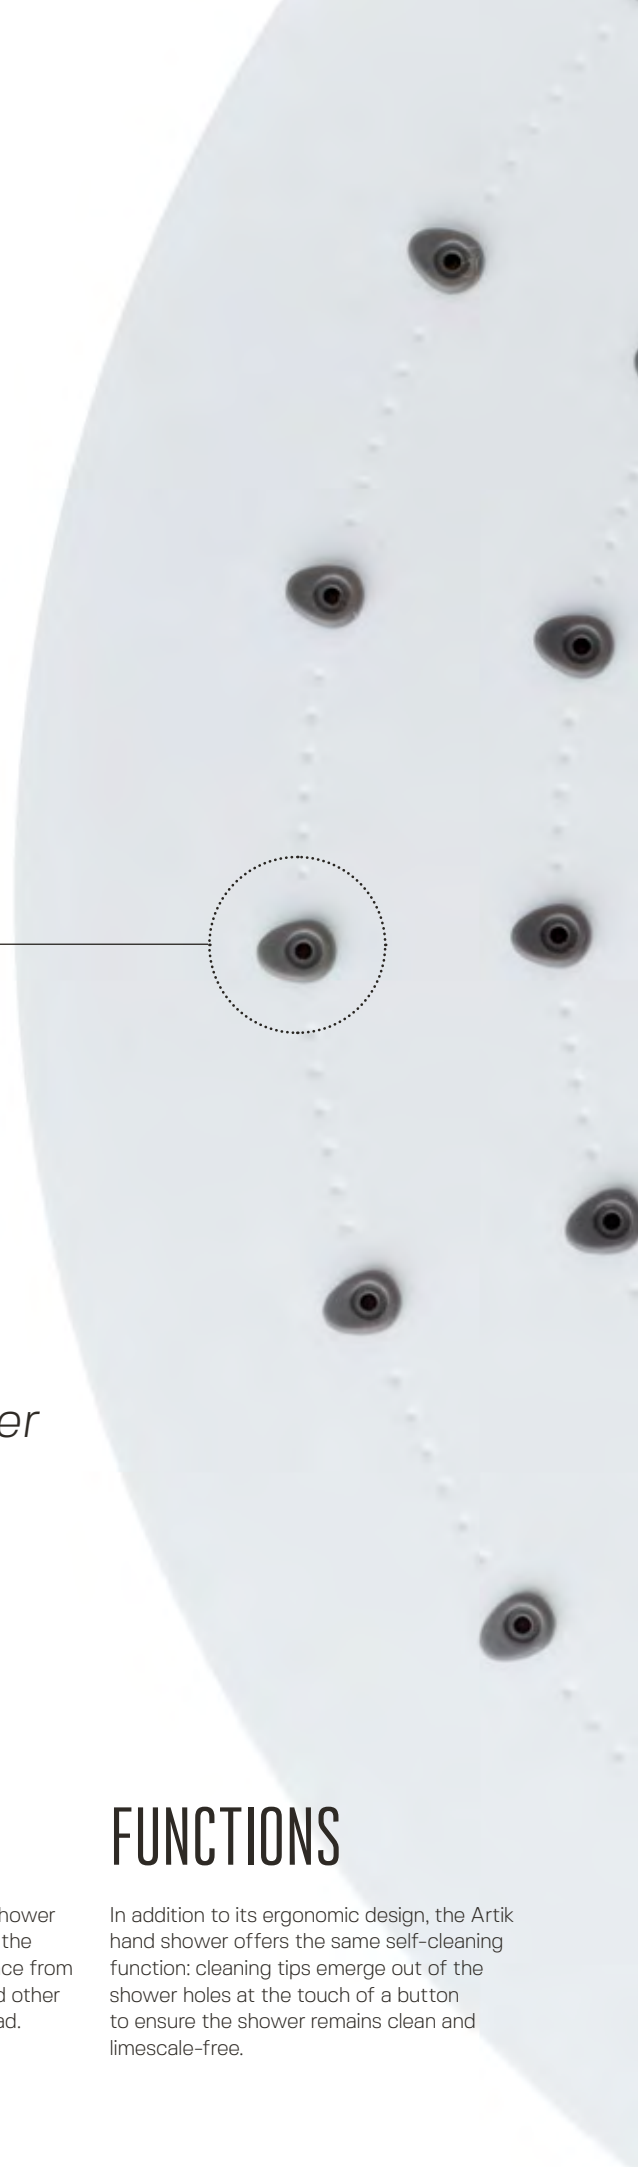

Keep your shower clean and fresh with our self-cleaning shower features.

SMOOTH DESIGN

The smooth design of the Artik head shower incorporates a self-cleaning feature at the touch of a button, when a tip will surface from each hole to help remove limescale and other accumulated residue in the shower head.

FUNCTIONS

In addition to its ergonomic design, the Artik hand shower offers the same self-cleaning function: cleaning tips emerge out of the shower holes at the touch of a button to ensure the shower remains clean and limescale-free.

CERAMIC TOILETS
AND BASINS

CERAMIC TOILETS AND BASINS

Ceramic has always played an important part in the history of mankind. We have shaped this timeless material to suit every taste.

High quality white ceramic

Double-glazed vitreous china for maximum resistance.

Soft close

No need to remember to close the toilet seat; a gentle tap on the lid after use will automatically cause it to silently close.

Water saving

Seeking to protect our planet, products displaying this label help to reduce water consumption.

Rimless design

The absence of a rim around the bowl keeps your toilet clean for longer

Dual outlet- floor or wall

Allowing for connection to either the floor or the wall.

Easy to clean

Easy to clean materials make for an easier life.

FORMENTERA

Travel from your home's most intimate space to the island of Formentera. Step into your bathroom and experience the crystal-clear beaches of Formentera with this collection of square but smoothly designed ceramics.

SHOWER TRAYS

The Teka Strohm extra-flat **shower trays are made in Spain** using an innovative state-of-the-art material of the highest quality cross-linked polymers and minerals.

The **Gel-Coat PREMIUM** coating vastly improves current standards, providing an exceptional non-slip surface that makes Teka Strohm shower trays one of the safest in the market.

Improved resistance to pitting corrosion in chloride environments.

Extra Safety, Extra Care.

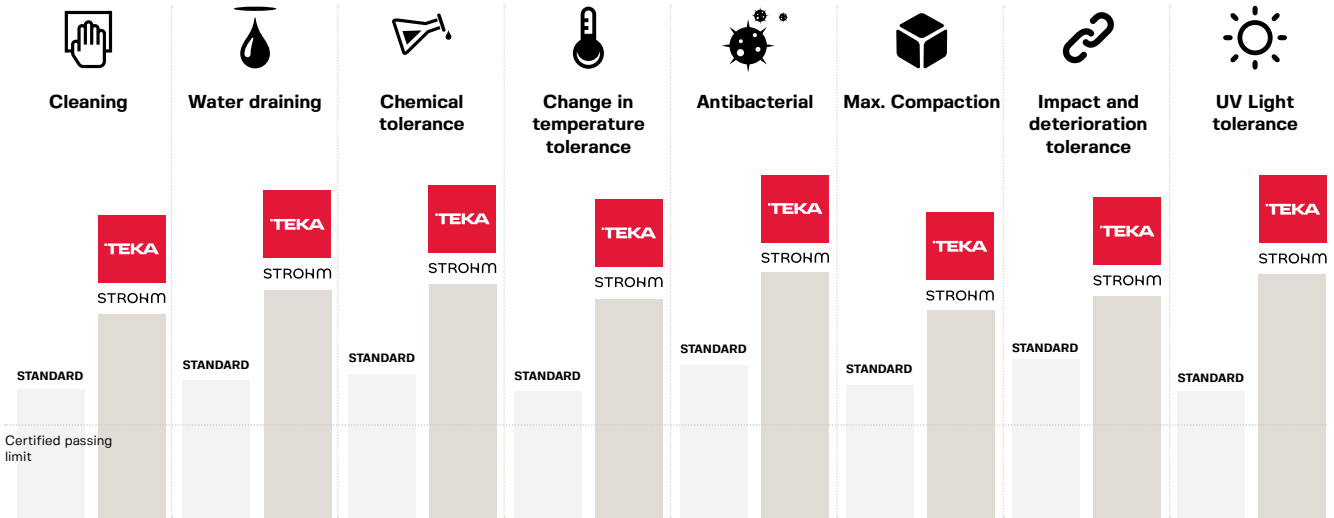

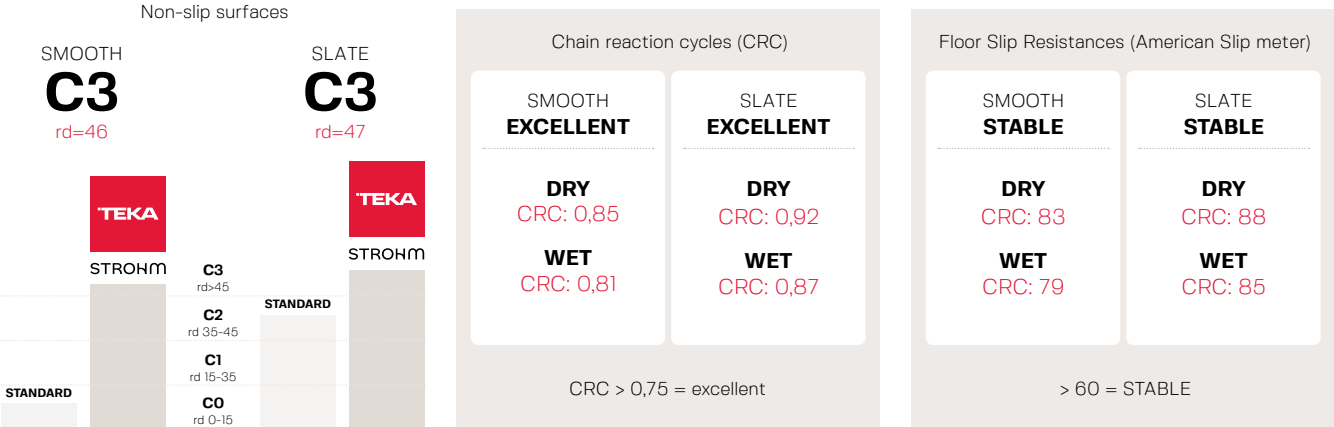

POLISHED STEEL GRIDS AISI 316:

At Teka Strohm we take care of every last detail to ensure a safe and pleasant shower experience. The grids of our shower trays are made of the highest quality **stainless steel (AISI 316)** which increases the resistance to general corrosion and high temperatures.

This material, commonly known as 'surgical steel', is used in the medical and pharmaceutical industries for its unparalleled safety and corrosion resistance.

GENERAL FEATURES OF OUR PRODUCTS

TAPS AND SHOWERS

Water saving

With a standard mixer, the average water flow goes from 12 to 16 liters/minute, depending on the pressure. Thanks to a flow limiter located at the aerator of our ECO mixers, the flow does not surpass 5 litres/minute, regardless of how high the pressure is.

Scalding prevention

All our thermostatic mixers are fitted with a 38 °C temperature stop. This device prevents unwanted temperature variations, thus reducing the risk of burns.

Super Eco A++

From 12 to 5 litres per minute at 3 bars of pressure.

Safe touch system

Some of our models include this extra safety device for additional protection.

Anti-scale aerator

Limescale protection system to extend the life of the aerator.

Environment-friendly

Teka Thermostatic Mixers help to save water and energy, thus protecting the environment.

Child protection

Safety temperature stop at 38° to prevent scalding. We take care of you and your family.

Noise reducers

The bath/shower and shower mixers incorporate noise reducers which substantially limit the noise made by water circulating through the tap.

Quick and easy installation

GENERAL TERMS AND CONDITIONS OF SALE

Teka Sanitary Systems S.A. (hereinafter "**Strohm**") wants to inform you that we have general terms and conditions (hereinafter the "General Conditions") that have the express purpose of regulating the conditions which are applicable in all contracting processes carried out by the users and readers of this catalogue of products and services offered by Strohm.

The General Conditions can be accessed by means of the following web link: www.strohm-teka.com

These General Conditions shall remain in force and shall be valid for as long as they are accessible through the mentioned link, without prejudice to the fact that Strohm reserves the right to modify, without prior notice the General Conditions and any legal texts that are exposed in the present catalogue or in its web pages. In any case, access to the website after its modification, inclusion and / or replacement, implies acceptance of them by the any buyer or user of Strohm products.

The buyer, user, client is subject to the General Conditions in force whenever entering into any contract or agreement. It is not possible to enter into a contract or agreement with regards to any product and / or service without the prior acceptance of the General Conditions and where appropriate the particular conditions governing the provision of certain services which are agreed between the parties involved.

The General Conditions are always valid when they are published and when their consulting is possible by means of the abovementioned link. If they are partially or totally modified any new general conditions will be applicable as of the moment they are available to the buyer, user or client.

ACCEPTANCE OF CONDITIONS:

All orders received imply the formal acceptance of the General Conditions, unless others were agreed otherwise in writing.

DESIGNS:

Our models and pictures contained in this catalogue or in any of our marketing and publicity content which are shown and on display are for illustration purposes only. The actual product which will be sold may vary in color or size.

GUARANTEE:

For cases where the Product or Products purchased present a lack of conformity because they do not correspond to the characteristics offered, present defects that prevent their normal use in accordance with their nature, or do not offer the services described for it, Strohm offers a 5-year guarantee for chromed or PVD single lever mixers, Dual Control or taps.

EXCEPTIONS:

Painted surfaces: 2 years.

Shower accessories (Ex.: hand showers, showerheads, shower arms..): 2 years

Thermostatic mixers: 5 years

Electronic mixers/taps: 2 years

Vanity Units: 2 years

Mirrors and lamps: 2 years

Ceramic/mineral basins: 2 years

WC and bidet: 2 years warranty (ceramic: 5 years, seat: 2 years, flush valve: 2 years)

Concealed cisterns: 2 years

Shower trays: 2 years

Shower enclosures: 2 years

*Please check in each local market if some extension guarantee is applicable.

The rights offered by this guarantee are subject to the bill of sale and the guarantee card that accompanies every model.

For this guarantee to be valid, the defect's acceptance by our Quality Department is necessary in each case.

Our guarantee only covers the replacement, free of charge, and in no case are we to be held responsible for the damages directly or indirectly caused by its defect.

Loose parts or parts that were chromed, painted or treated, and that were cleaned using aggressive products, or stained by inappropriate substances, are not covered by our guarantee.
